

Calls to Action for My Website

There are two vital calls to action that I intend for my website to have. The first call to action is for the first page of my website, which will include: pricing, tips for best haircuts, "dos and don'ts" and a portfolio of my work, to incite the visitor to click on a "Schedule An Appointment" button. This will be located at the bottom of the page to insure that visitors actually read the content. The second call to action is for the visitor to actually schedule an appointment with me.
